Job Title: Graduate Engineer Trainee (Civil)

Location: Kolkata

Company: Skipper Limited

Established in 1981, Skipper Limited today is a USD 300 million company. Skipper Limited is the largest manufacturer of Transmission & Distribution structures in India and among the top 10 globally. It is also a national powerhouse in the Polymer Pipes & Fittings business, and manufactures premium quality products under the brand name Skipper Pipes, which serves both the agricultural and plumbing sectors.

Job Description:

We are looking for a motivated Graduate Engineer Trainee (Civil) to join our manufacturing team. As a Graduate Engineer Trainee, they will undergo comprehensive training and development to gain hands-on experience in various aspects of civil engineering within a manufacturing environment. This role offers an excellent opportunity for recent graduates to kick-start their career and develop essential skills in the field of civil engineering.

Key Responsibilities:

- Assist in the design, planning, and execution of civil engineering projects within the manufacturing facility.
- Collaborate with architects, contractors, and other stakeholders to ensure project requirements are met within specified timelines and budgets.
- Participate in the preparation and review of drawings, specifications, and technical documentation.
- Assist in conducting quality inspections and tests on materials and structures.
- Learn and apply principles of structural analysis and design to optimize building structures and foundations.
- Support environmental compliance efforts by implementing sustainable construction practices and waste management strategies.
- Provide technical support and assistance to maintenance teams for facility repairs and upgrades.
- Prepare progress reports, presentations, and other project-related documentation as required.

Requirements:

- Proficiency in AutoCAD or other CAD software is desirable.
- Excellent analytical and problem-solving skills.
- Effective communication and interpersonal skills.
- Ability to work independently as well as part of a team.
- Eagerness to learn and adapt to new challenges..

Benefits:

- Competitive salary package.
- Comprehensive training and development opportunities.
- Health insurance and other benefits as per company policy.
- Mentorship from experienced engineers.
- Opportunities for career advancement and growth within the company.
- Positive and inclusive work culture.

Job Title: Graduate Engineer Trainee (GET) - Electrical Engineer

Location: Kolkata

Company: Skipper Limited

Established in 1981, Skipper Limited today is a USD 300 million company. Skipper Limited is the largest manufacturer of Transmission & Distribution structures in India and among the top 10 globally. It is also a national powerhouse in the Polymer Pipes & Fittings business, and manufactures premium quality products under the brand name Skipper Pipes, which serves both the agricultural and plumbing sectors.

Job Description:

We are seeking a talented and enthusiastic Graduate Engineer Trainee (GET) to join our team as an Electrical Engineer. As an Electrical Engineer, they will play a key role in the design, implementation, and maintenance of electrical systems and equipment. This is an excellent opportunity for recent graduates who are passionate about electrical engineering and eager to gain hands-on experience in a dynamic work environment.

Key Responsibilities:

- Assist in the design and development of electrical systems, including power distribution, control panels, and lighting.
- Collaborate with cross-functional teams to integrate electrical systems into overall project designs.
- Perform electrical calculations, simulations, and analysis to ensure system performance and reliability.
- Assist in the selection of electrical components and materials based on project requirements and specifications.
- Participate in the installation, testing, and commissioning of electrical equipment and systems.
- Troubleshoot electrical issues and implement corrective actions to ensure smooth operation.
- Develop and maintain electrical documentation including schematics, wiring diagrams, and equipment specifications.
- Ensure compliance with relevant codes, standards, and regulations governing electrical installations.
- Support continuous improvement initiatives to enhance efficiency, safety, and quality in electrical engineering processes.
- Stay updated on emerging trends and technologies in electrical engineering to drive innovation and best practices.

Requirements:

- Strong technical skills in electrical design, analysis, and troubleshooting.
- Proficiency in computer-aided design (CAD) software for electrical schematics (e.g., AutoCAD, EPLAN).
- Excellent problem-solving and analytical abilities.
- Effective communication and teamwork skills.
- Familiarity with electrical codes and standards (e.g., NEC, IEC).
- Prior internship or co-op experience in electrical engineering is a plus.

- Ability to work independently and manage multiple tasks simultaneously.
- Willingness to learn and adapt to new technologies and industry trends.
- Join our team and embark on an exciting journey to build a rewarding career .

Job Title: Graduate Engineer Trainee (Mechanical)

Location: Kolkata

Company: Skipper Limited

Established in 1981, Skipper Limited today is a USD 300 million company. Skipper Limited is the largest manufacturer of Transmission & Distribution structures in India and among the top 10 globally. It is also a national powerhouse in the Polymer Pipes & Fittings business, and manufactures premium quality products under the brand name Skipper Pipes, which serves both the agricultural and plumbing sectors.

Job Description:

We are seeking a motivated Graduate Engineer Trainee (Mechanical) to join our dynamic team. As a Graduate Engineer Trainee, they will undergo comprehensive training and development to gain hands-on experience in various aspects of mechanical engineering within a manufacturing environment. This role offers an excellent opportunity for recent graduates to kick-start their career and develop essential skills in the field.

Key Responsibilities:

- Assist in the design, development, and implementation of mechanical systems, components, and processes.
- Support senior engineers in conducting feasibility studies and evaluating engineering solutions.
- Participate in product testing, analysis, and troubleshooting to ensure quality standards are met.
- Collaborate with cross-functional teams including production, quality assurance, and procurement to optimize manufacturing processes.
- Learn and apply industry standards and regulations relevant to mechanical engineering.
- Contribute to continuous improvement initiatives to enhance productivity, efficiency, and safety.
- Prepare technical documentation, reports, and presentations as required.
- Stay updated with advancements in mechanical engineering technologies and techniques.
- Adhere to company policies, procedures, and safety guidelines at all times.

Requirements:

- Excellent analytical and problem-solving skills.
- Effective communication and interpersonal skills.
- Ability to work independently as well as part of a team.
- Eagerness to learn and adapt to new challenges.

- Prior internship or co-op experience in a manufacturing environment is a plus.
- Willingness to travel occasionally for training or project assignments.

Benefits:

- Competitive salary package.
- Comprehensive training and development opportunities.
- Health insurance and other benefits as per company policy.
- Mentorship from experienced engineers.
- Opportunities for career advancement and growth within the company.
- Positive and inclusive work culture.
